

Mariam Andersen of Children's Medical Center at Dallas has recently joined the Clinical Research Department as the Clinical Research Coordinator for AmSMART. Mariam joined Children's Medical Center in May 2006 as a Clinical Research Associate in pediatric oncology for the Center for Cancer and Blood Disorders, where she was responsible for enrolling and maintaining data for leukemia and lymphoma patients on Children's Oncology Group protocols.

Originally beginning her research career at The University of Texas Southwestern Medical Center at Dallas as a research coordinator for The Mood Disorders Research Program and Clinic, Mariam managed 3 national clinical trials in depression and anxiety in adults. Mariam also has experience in administering neuropsychological screenings on children and adults, and evaluating cognitive functioning and impairment.

Mariam holds a master's degree in educational psychology from The University of Texas at Austin and bachelor's degree in psychology from Southern Methodist University. She is a member of the Society of Clinical Research Associates, an associate member of the Children's Oncology Group, and recently earned her certification as a Clinical Research Professional.

Mariam Andersen, M.A., CCRP
Clinical Research Coordinator for Pediatric Neurology
